Covid-19 pandemic underscores role of MGNREGA as safety net despite shortcomings: Study

The survey was conducted in 2,000 households across eight blocks in Phulparas (Madhubani) and Chhatapur (Supaul) in Bihar, Bidar (Bidar) and Devadurga (Raichur) in Karnataka, Khalwa (Khandwa) and Ghatigaon (Gwalior) in Madhya Pradesh, and Wardha (Wardha) and Surgana (Nashik) in Maharashtra.

Recommending massive expansion of the programme to deal with high work demand, the study also the government should ensure that computerised receipts are given to the workers for work demanded. (Representational image/Express)
MGNREGA improved earnings during Covid-19, but more funding needed: Report

According to the 'Employment Guarantee during Covid-19' report, the spending on the MGNREGA needs to go up by three times.

39% of job card-holding households didn't get any work under MGNREGA in FY21

Synopsis
About 39% of all job card-holding households seeking work under the Mahatma Gandhi National Rural Employment Guarantee scheme did not get a single day of work in the Covid year of 2020-21 as against the average work demand for 77 days, shows a study conducted by Azim Premji University in partnership with the National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD).

About 39% of all job card-holding households seeking work under the Mahatma Gandhi National Rural Employment Guarantee scheme did not get a single day of work in the Covid year of 2020-21 as against the average work demand for 77 days, shows a study conducted by Azim Premji University in partnership with the National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD).
Around 39 pc MNREGA card holders didn’t get single day of work in 2020-21: Survey

New Delhi, Oct 13 (PTI) Around 39 per cent of all job card-holding households interested in working under the MNREGA scheme did not get a single day of work in the Covid pandemic year 2020-21, according to a survey.

On average, only 36 per cent of the households that worked received their wages in 15 days, showed the survey of 2,000 households across eight blocks in four states conducted by Azim Premji University in partnership with the National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD).

The survey was conducted in November-December 2021 in Phulparas (Madhubani) and Chhatapur blocks (Supaul) in Bihar, Bidar (Bidar) and Devadurga (Raichur) in Karnataka, Khalwa (Khandwa) and Ghatigaon (Gwalior) in Madhya Pradesh, and Wardha and Surgana (Nashik) in Maharashtra.
Around 39 pc MNREGA card holders didn't get single day of work in 2020-21 Survey

New Delhi, Oct 13 (PTI) Around 39 per cent of all job card-holding households interested in working under the MNREGA scheme did not get a single day of work in the Covid pandemic year 2020-21, according to a survey.

On average, only 36 per cent of the households that worked received their wages in 15 days, showed the survey of 2,000 households across eight blocks in four states conducted by Azim Premji University in partnership with the National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD).

The survey was conducted in November-December 2021 in Phulparas (Madhubani) and Chhatarpur blocks (Supaul) in Bihar, Bidar (Bidar) and Devadurga (Raichur) in Karnataka, Khalwa (Khandwa) and Ghatigaon (Gwalior) in Madhya Pradesh, and Wardha and Surgana (Nashik) in Maharashtra.

"Across all blocks, roughly 39 per cent of all the job card-holding households interested in working under MGNREGA in the Covid year could not get a single day of work while they wanted 77 days of work on average.

"Among households that found some work, the unmet demand (difference between the number of days desired and the number of days of work received) across all blocks was 64 days," the report stated.

"The most frequently mentioned reason for not getting as much work as needed, across all blocks, was the lack of adequate work being sanctioned or opened. On average, 63 per cent of all job card-holding households cited this reason in the surveyed blocks," it added.
New Delhi, Oct 13: Around 39 per cent of all job card-holding households interested in working under the MNREGA scheme did not get a single day of work in the Covid pandemic year 2020-21, according to a survey.

On average, only 36 per cent of the households that worked received their wages in 15 days, showed the survey of 2,000 households across eight blocks in four states conducted by Azim Premji University in partnership with the National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD).

Around 39% MNREGA card holders didn't get single day of work in 2020-21: Report

According to a report, around 39% of MNREGA card holders did not receive any work in 2020-21. This is despite the government's efforts to improve the scheme's implementation.

The report highlights the challenges faced by the scheme in providing work to beneficiaries, especially in rural areas. It also points out the need for better monitoring and evaluation to ensure that the scheme is reaching its intended beneficiaries.

The report recommends that the government should take immediate action to address the issues highlighted and ensure that the scheme is effectively implemented in the future.

मनरेगा कार्डधारकों में से 39 प्रतिशत को 2020-21 में एक दिन का भी काम नहीं मिला: सर्वे

नयी दिल्ली, 13 अक्टूबर (बारिश) करीब 39 प्रतिशत मनरेगा कार्डधारक परिवारों को कोविड महामारी यात्रा वर्ष 2020-21 के दौरान एक दिन का भी काम नहीं मिला। एक सर्वे में यह बताया गया है।

अजीम प्रेमजी विश्वविद्यालय ने चार राज्यों के आठ ब्लॉक में 2,000 परिवारों का सर्वे किया है। यह सर्वे 'नेशनल कंसॉर्टियम ऑफ फिबरल सोसायटी ऑर्गनाइजेशन ऑन नरेगा' तथा 'कोलेजबॉरो रिसर्च एंड डिजीमेनेशन' के सहयोग से किया गया।

इसमें बताया गया कि जिन परिवारों ने काम किया उनमें से औसतन महज 36 प्रतिशत परिवारों को ही 15 दिन के भीतर उनका भुगतान प्राप्त हुआ है। नवम्बर-दिसंबर 2021 में यह सर्वे बिहार, कर्नाटक, मध्य प्रदेश और महाराष्ट्र में किया गया।

रिपोर्ट में बताया गया, "सभी ब्लॉक के रोजगार कार्डधारक परिवारों में से 39 प्रतिशत परिवार जो कोविड से प्रभावित वर्ष के दौरान मनरेगा में काम करने के इच्छुक थे और औसतन 77 दिन का काम चाहते थे लेकिन उन्हें एक भी दिन काम नहीं मिला।" 

सर्वे के मुताबिक, कई तरह की खासियतों के बावजूद महामारी गांवी राज्यों में रोजगार गांवी अधिनियम महामारी के दौरान मददगार साबित हुआ और इसकी दोहराए जा सकें इसका बढ़ावा गया। उनके अनुसार, "हमारे शोध के पता चला कि कामगार मनरेगा की उपयोगिता और जरूरत को ज्ञाति महत्त्व देते हैं। दस में से आठ परिवारों ने कहा कि मनरेगा के काम अर्थव्यवस्था प्रति व्यक्ति 100 दिन का रोजगार दिया जाना चाहिए।"

**Around 39% MGNREGA card holders didn't get 'single day of work in 2020-21'**

'Across all blocks, roughly 39 per cent of all the job card-holding households interested in working in MGNREGA in the Covid year could not get a single day of work while they wanted 77 days of work on average,' according to a report.

**New Delhi:** Around 39 per cent of all job card-holding households interested in working under the MNREGA scheme did not get a single day of work in the COVID-19 pandemic year 2020-21, according to a survey.

On average, only 36 per cent of the households that worked received their wages in 15 days, showed the survey of 2,000 households across eight blocks in four states conducted by Azim Premji University in partnership with the National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD).
39% Households with NREGS Cards didn't get any Work in FY21: Study

New Delhi: About 39% of all job card-holding households seeking work under the Mahatma Gandhi National Rural Employment Guarantee (MGNREGA) scheme did not get a single day of work in the Covid-19 year of 2020-21 when average work demand was for 77 days, shows a study.

Even among households that found some work, the unmet demand – or, the difference between number of days desired and the number of days of work received – was 64 days, said the study conducted by Azim Premji University in partnership with National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD).

However, the scheme protected the most vulnerable households from significant loss of income during the pandemic, said the study that recommended massive expansion of MGNREGA to deal with high work demand and increasing wages.
MGNREGS helped people stay afloat during Covid-19: Report

RAGHUR AGGARWAL
New Delhi, 13 October

MGNREGS compensated nearly 20-80 per cent of the income loss during the Covid-19 pandemic, showed a report released on Thursday. According to the Employment Guarantee during Covid-19 study, three out of five households surveyed said that the Mahatma Gandhi National Rural Employment Guarantee Scheme (MGNREGS), 2005, contributed positively to overall development in their village. The study was conducted across four states — Maharashtra, Madhya Pradesh, Bihar, and Karnataka — by Azim Premji University, National Consortium of Civil Society Organisations on NREGA, and Collaborative Research and Dissemination.

“A conservative estimate yields the fact that the allocations in the surveyed blocks should have been three times the amount that was actually allocated in the year after lockdown to fulfill the true extent of work demand,” said Azim Premji University Faculty member Rakeshwar Narmlekan, a co-author of the study.

In the high-performance blocks in Karnataka and Madhya Pradesh, over 50 per cent of people said that MGNREGS earnings made a difference to their financial situation. High-performing blocks were the ones given the highest performance ratings by the management information system of the government. In Maharashtra, 98 per cent of people believed that they would have reduced their food consumption if it was not for MGNREGS earnings. Meanwhile, eight out of 10 households want the scheme to be extended to give employment to 100 days per person per year.

However, during the lockdown, the government rationed the number of days that people were allowed to work under the scheme. At one point, it was 7 days as compared to the usual 100 days.

A majority of people in all the surveyed states said that they could not work due to the inadequate amount of work available. The budgetary allocation for the scheme has gone up in recent years.
MGNREGS made up for up to 80% Income loss during pandemic

‘MGNREGS made up for up to 80% income loss during pandemic’

NEW DELHI

In a first providing empirical evidence, a study conducted on the impact of the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) during the COVID-19 pandemic has revealed that the wages earned under the Act helped people compensate between 20% and 80% of the income loss incurred because of the lockdown. The report also said that around 39% all job card-holding households interested in working under the MGNREGA did not get a single day of work in the year 2020-21.

The study titled, “Employment guarantee during COVID-19: The Role of MGNREGA in the year after the 2020 lockdown” conducted by Centre for Sustainable Employment, Azim Premji University, collaborative Research and Dissemination (CORD), Samaj Pragati Sahyog and NREGA consortium was released on Thursday. The study was aimed at determining the extent to which working in the programme provided income support to vulnerable households during the pandemic.

The team surveyed a total of eight blocks in four States – Bihar, Karnataka, Maharashtra and Madhya Pradesh. The final report of the survey that was conducted in December 2021 said, “For households who had not worked in the pre-COVID year but did find work during the COVID year, we find that MGNREGA earnings compensated for anywhere between 20% and 100% of income lost from other sources.”

The study, however, also pointed out that MGNREGA was unable to meet with the actual demand from the ground. Across the eight blocks on an average 39% of households did not get a single day’s work. “This means two out of five households that needed work in the COVID year did not get even a single day of MGNREGA work. And, those households that did not get a single day of work, actually wanted 77 days of work in the year on average,” the study pointed out.
39% MGNREGA card-holders didn’t get any work in Covid yr

‘39% MGNREGA card-holders didn’t get any work in Covid yr’

AJITH ATHRADY
NEW DELHI, DHNS

Around 39% of all job card-holding households interested in working under the MGNREGA scheme did not get a single day of work in the pandemic year of 2020-21, said a latest study.

Only 36% of households who worked under the scheme received their wages in 15 days, said the study conducted by Azim Premji University in partnership with the National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD).

The survey of 2,000 households across eight blocks in four states was conducted in November-December 2021. It covered Phulpars and Chhatapur in Bihar, Bidar and Devadurga in Karnataka, Khalwa and Ghangon in Madhya Pradesh, and Wardha and Surgana in Maharashtra.

MGNREGA guarantees 100 days of employment to every rural household that demands work.

The most frequently mentioned reason for not getting as much work as needed, across all blocks, was the lack of adequate works being sanctioned.

More than 8 in 10 households recommended that MGNREGA (Mahatma Gandhi National Rural Employment Guarantee Act) should be 100 days per person per year while 3 out of 5 households said that MGNREGA contributed positively to the overall development of their village.

Despite its shortcomings, earnings from MGNREGA were able to compensate between 20% and 30% of income loss for households during the Covid-19 lockdown.

“Our study shows how much the workers value the need and utility of MGNREGA. More than 8 out of 10 households recommended that MGNREGA provide 100 days of employment per person per year,” said Rajendran Narayanan, co-author of the study and faculty member at Azim Premji University.
39% NREGA jobseekers could not get single day of work

PIONEER NEWS SERVICE
NEW DELHI

During the Covid pandemic year 2020-21, although around 39 per cent of all the job card-holding households interested in working under the MGNREGA did not get a single day of work, nevertheless the jobs scheme rose to the need and provided work for many more villages and many more households than in the preceding years, according to a report.

The report based on the survey of 2,000 households across eight blocks in four states was prepared by Azim Premji University in partnership with the National Consortium of Civil Society Organisations on NREGA and Collaborative Research and Dissemination (CORD) in November-December 2021. Workers from Madhya Pradesh (Malwa) and Chhattisgarh blocks (Singra) in Chhattisgarh, Kherla (Khandwa) and Ghatigaon (Gujjar) in Madhya Pradesh, and Merta and Surajpur (Nashik) in Maharashtra were surveyed, said the report.

Among households that found some work, the average demand difference between the number of days desired and the number of days of work received across all blocks was 64 days, the report stated.

“The most frequently mentioned reason for not getting as much work as needed, across all blocks, was the lack of adequate work being sanctioned or opened,” it said.

On average, 63 per cent of all job card-holding households cited this reason in the surveyed blocks,” it added.

Despite these shortcomings, the survey found, the rural employment Act made a marked difference during the pandemic, protecting the most vulnerable households from significant loss of income. Increased earnings from MGNREGA were able to compensate for somewhere between 20 to 50 per cent of the income loss depending on the block, it stated.

“Our study shows how much the workers value the need and utility of MGNREGA. More than eight out of 10 households recommended that MGNREGA should provide 100 days of employment per person per year,” it said.

We also found a massive extent of underutilisation. A conservative estimate yields that the allocations in the surveyed blocks should have been three times the amount that was actually allocated in the year after lockdown to fulfil the true extent of work demand,” said Rajendra Narayan, co-author of the study and faculty member at Azim Premji University. Ashwini Kalhara of the NREGA Consortium said one of the objectives of MGNREGA is to act as a safety net for people during times of distress.

“Covid pandemic, lockdown created unprecedented distress and MGNREGA, as expected, rose to the need and provided work for many more villages and many more households than in the preceding years,” said Kalhara.
No MGNREGA work for 39% during crippling 2021-22

The survey was conducted in November 2021 in Hathnur (Mysore district) and Belagavi in Karnataka (Mandya and Tumakuru districts). The survey was said to be carried out by Azim Premji University in partnership with the National Centre for Civil Society Organisation Development and Innovation (NCCODI).

Despite the survey showing that the economy was facing a challenge, the report stated, "This is the first time in the history of India that we have seen a dip in the MGNREGA work done."

The report also stated, "The lack of work in MGNREGA was a major reason for the dip in the GDP."

39 pc MNREGS members didn’t get job in 2020-21: Survey

NEW DELHI: Around 39 per cent of all job-card-holding households interested in working under the MNREGS scheme did not get a single day of work in the Covid pandemic year 2020-21, according to a survey.

On average, only 39 pc of the households that worked received their wages in 15 days, showed the survey of 2,500 households across eight blocks in four states conducted by Azim Premji University in partnership with the National Consortium of Civil Society Organizations on MNREGS and Collaborative Research and Dissertations (CORD). The survey was conducted in November 2021 in Palanpur (Bhopal) and Chhatarpur blocks (Sagar) in Bhopal, Bida (Bihar) and Dweepnagar (Kutch) in Gujarat, and the number of days a job card holder worked was 64 days, the report stated.

The most common reason for not getting as much work as needed, across all blocks, was the lack of adequate work being sanctioned or opened, it added.

Despite these shortcomings, the survey found, the scheme made a marked difference during the pandemic, protecting the most vulnerable households from significant loss of income. Increased earnings from MNREGS were able to compensate for somewhere between 20 to 40 per cent of the income lost depending on the block, it stated.

“Our study shows how much the worst-off value the need of MNREGS. More than eight out of 10 households wanted the scheme to provide 100 days of employment per person per year,” the survey said.
